

Thinking about solar? Here's how Prairie Land can help.

- Energy Needs:** By analyzing your past usage, Prairie Land can help you determine what size of system that you need, and how much you can save by using solar.

- Safety Concerns:** If you'll stay on the grid for supplemental power, your system will also add power to the lines at times. This can be a deadly hazard for lineworkers and emergency personnel without a properly inspected installation.

- Legal Obligations:** Prairie Land can explain the interconnection agreements that are required for solar users on our lines.

Whether you are just curious, or your mind is already made up, it's a good idea to start a contractor-homeowner-Prairie Land partnership as early as possible so there are no surprises.
